

Build High-Performing Teams with PI Design

Overview

Work is more cross-functional than ever. However, most teams struggle with mistrust, miscommunication, and misalignment. This hurts morale, impacts retention, and risks your business goals.

This workshop, led by a PI expert, will help you unlock a team's strengths and address areas for improvement. It will equip you with tools that will help you leverage behavioral data to gain alignment and optimize team performance.

Learnings

After attending, participants will be able to:

- Boost understanding of team strengths and potential gaps
- Leverage a common language to work together more effectively
- Avoid miscommunication and establish a clear direction for your team

Format

This half-day workshop can be delivered in person or virtually by expert facilitators.

Audience

- Executives
- HR leaders
- People managers
